Since you all insist on lying in the minutes of the September meeting, where my discussion confirming my request to make a presentation longer than the allotted time with Mr. Singh, and with Mr. Rolfes ahead of time. I also sent the email to Mike the following day to confirm that I had made the request within the time limit, but your minutes just say I couldn't go on and threw the microphone down (untrue, I knocked it over when I got up, that's VERY different)

Your minutes don't provide any of that context because you would rather cover for yourself. I have the entire audio and will make the time to put together a video of each and every comment including the chair's insistence that I provide a conclusion when it was a comment period. It will also include the timer for the 35 minutes taken to discuss the meaning of the word meltdown (not on the agenda) and the world history according to Ms. Rowe, (also not on the agenda) and then my permitted presentation was denied.

Since you don't want to make that part of the record, I will. I'm already humiliated over all of this, so I will now make it my goal to get the truth out about this board. Including why the Director of the department you are supposed to be independent from, keeps hiring the administrators for positions. Sounds like it's not very independent at all.

This was supposed to help our community, but clearly CYA is the only thing on the menu. That will be shown publicly as that is in the public interest to see how the funding for this nonsense is being used.

I have 946 people following my SSFLNational Monument page, compared to the small group following the CAG, and my videos have quite a following, and great reach (that's number of user views on my videos), so I am sure that the failure to get the cleanup right will be of serious interest to these people because the only way we get a future for our community is if we have a believable cleanup, and that isn't possible when DTSC continues to lie to us every step of the way. Why are we using fake data to sell false truck routes to the public several years before any real estimates are given? I guess we're gonna have to find out. We'll see how many laws DTSC is willing to break to cover up their dirty pool regarding making the community afraid of the cleanup so the polluter won't have to do it. We've waited a long time, and don't have time for lies to cover up DTSC's bad deeds. If the IRP is more interested in rewriting history to make themselves look better, than to get this right, so we actually get a cleanup that is accountable and raises trust....then we just have to use pressure in the form of shining a brighter light on the disservice to the communities affected that occurs all in the name of DTSC/IRP ego.
