

Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances through the restoration of contaminated resources, enforcement, regulation and pollution prevention.

DTSC Receives Permit Renewal Application From Lawrence Berkeley National Laboratory, 1 Cyclotron Road, Berkeley CA 94720

On June 17, 2016, The Department of Toxic Substances Control (DTSC) received the permit renewal application from Lawrence Berkeley National Laboratory (LBNL). LBNL requests authorization from DTSC to continue the storage and treatment of hazardous waste. After DTSC completes our review of the permit application, DTSC will then prepare a draft permit for public review and comment.

LBNL conducts research in a number of fields including high-energy physics, materials research, geology, molecular biology, biomedical research, accelerator research and development. Their activities include treatment and storage of hazardous waste. The main treatment activities are consolidation, neutralization, solidification, desensitization, oxidation, absorption, adsorption, metallic replacement, evaporation, rinsing of empty containers, and mixing of resins.

If DTSC renews the Permit, we will allow LBNL to treat and store hazardous waste. Their 200 acre facility is located above the UC Berkeley campus (please see over for a map). This permit would be in effect for ten years.
