Re: Thermostat Recycling Corporation's Annual Report

Dear Ms. Sahsrabudhe:

Attached is TRC's 2009 annual collection report for the Department. To the extent practicable TRC has made its best effort to be responsive to the Department's request for expense and collection data. A copy of this report is also available on www.thermostat-recycle.org.

TRC would like to take the opportunity to summarize some of its major accomplishments in 2009.

- Notwithstanding a severe recession that depressed the replacement market for thermostats, the national recovery of thermostats increased by 14.8 percent keeping almost 1500 pounds of mercury out of solid waste.
- Industry participation in TRC continued to grow and by the end of the year TRC represented 28 manufacturers that historically branded and distributed mercury switch thermostats.
- TRC also saw substantial growth in access to the program, with the number of recycling containers increasing at participating collection locations by 30%. TRC saw solid growth in all collection location types in 2010.

Wholesaler and HVAC contractor requirements under Assembly Bill 2347 went into effect July 1, 2009 and TRC began implementation of its program last spring. TRC also completed the study on mercury thermostats in 2009.

Looking towards 2010, TRC plans on specifically targeting California HVAC contractors and technicians as well as other stakeholders to raise awareness of their obligations under California law to properly manage waste mercury thermostats.

Sincere Regards,

A handwritten signature in black ink, appearing to read "Mark Tibbetts", written over a white background.

Mark Tibbetts
Executive Director

2009 Thermostat Recycling Corporation Annual Report

Mercury Recovery Data

TRC recovered 104.29 pounds of mercury from intact mercury thermostats and mercury switches from California collection locations in 2009. TRC recovered 7,542 whole thermostats in 2009, an increase of 7.64% over the previous year.

Management of Out-of Service Mercury Thermostats

Bins with waste mercury-switch thermostats are received at the fulfillment/processing center in Golden Valley, Minnesota. The facility is owned and operated by Honeywell, Inc. on contract with TRC.

Bins are received at the loading dock and sent to TRC processing area. The bin and plastic liner are opened and the contents are identified, sorted, and tallied. The following data is recorded for each bin returned and processed: bin number, business name, city, state, zip code, date returned, number of thermostats, and bulbs by manufacturer as well as any non-conforming material¹.

The bin is returned to location with a new prepaid address label within 72 hours of receipt. The thermostats are stored in a plastic lined carton in a storage area for final processing. The containers are dated and processed in order received, first in-first out.

The containers are returned from the storage area to the TRC processing area to have the mercury bulbs removed from the plastic housing. (Universal Waste Regulations require the disposal of waste within 12 months of generation. TRC's processor requires that the disposal occur within 6 months of generation and TRC follows the more stringent requirement.) Small quantities of thermostats are removed from the container, which is then closed again, and placed at the bulb removal workstation on a tray that contains any potential mercury spillage. The bulbs are removed from the thermostats and placed into a 2 quart container at the work station. In the event that a bulb breaks and mercury spills, the work area is designed to contain the spillage and the operators are trained in the clean-up and disposal of mercury. TRC processing area is equipped with special mercury vacuum cleaners and the work area is vacuumed at the end of the work day to assure that any spillage is cleaned up and not left to evaporate.

The 2 quart container is emptied into a special 55 gallon drum which is labeled and dated according to regulations. The drum is sealed with a band and is only opened when contents are being added to it. Special negative pressure venting assures any fumes are drawn away and vented when the drum is opened.

The 55 gallon drum is then shipped to Bethlehem Apparatus Corporation in Hellertown, Pennsylvania for final processing of the mercury ampoules (bulbs). Bethlehem Apparatus meets or exceeds all local, state, federal and EPA regulations for the management of the product. Bethlehem's approvals for mercury recovery/recycling include:

- EPA - identification No. PAD002390961 (Bethlehem Apparatus Co., Inc.)
- EPA BDAT Requirement - satisfied by all recovery operations
- CERCLA (Comprehensive Environmental Response Compensation and Liability Act)
- Pennsylvania Department of Environmental Protection

¹ TRC closely monitors compliance with its storage and shipping policies. Instances where collection locations ship products other than whole mercury-switch thermostats are tracked and locations received written warnings for non-compliance. Repeated or gross violations may result in suspension of the location's participation in the program.

The facilities' processing follows all EPA guidelines and regulations. TRC has a facility license from Hennepin County Minnesota for the operation of the TRC. Honeywell, Inc. has a Hazardous Waste Generator license from Hennepin County. All persons who handle mercury thermostats as part of the TRC operation receive training in the handling Hazardous Waste and Universal Waste.

Program Education and Outreach

Wholesaler/Retailer Recruitment—in June TRC sent a letter (attached: Appendix A) to approximately 1300 HVAC and/or electrical wholesale outlets in California. The letter provided information on the legal obligation to collect waste mercury thermostats and the ease of complying with the law through participation in TRC collection program.

TRC also provided information on the legal requirement to collect mercury thermostats to Heating Airconditioning & Refrigeration Distributors International (HARDI) regarding the new law and exhibited/presented at the association's annual meeting in November 2009. Stakeholder outreach, while targeting contractors, was also intended to raise awareness among distributors regarding their legal obligations.

TRC has also targeted larger HVAC wholesalers with multiple branch locations in California and distributors primarily selling through the internet. TRC has reached out these organizations with emails and/or phone calls in an attempt to inform them of their legal obligations in California and other states.

Media releases have also referenced the legal requirement for wholesalers to act as a collection point.

TRC worked with ACE Hardware corporate to promote retail collection of waste mercury thermostats. Activities included communications to ACE member retailers on the program and exhibiting at the invitation-only national ACE vendor trade show in November 2009.

A listing of TRC collection locations² in California is attached (see appendix).

HHW Awareness— TRC worked closely with the California Product Stewardship Council (CPSC) to raise awareness about the availability of no-cost TRC collection bins to local governmental agencies for use at household hazardous waste collection facilities.

- **Media Release:** In June, TRC provided CPSC with a media release regarding the implementation of the program and the availability of collection containers to local governments.

² TRC makes a best effort to list all participating locations in its database. However, some locations opt to send bins initially to a central facility and until the bins are returned we do not have specific site addresses in our system. Planned updates in 2010 to TRC's database should help address this issue.

- Webinar: In December TRC participated in a webinar sponsored by CPSC and California Sierra Club that targeted local governments. TRC provided information on the program and how to request collection containers.

HVAC Contractor Awareness—TRC conducted a number of activities to raise awareness of the thermostat recycling program and HVAC contractors’ legal obligations in California. A key component of the effort was the launch of a new TRC’s website and the development of the search tool for easy search of TRC collection locations nationwide. Other activities included:

- Media Release: TRC issued a media release on July 8, 2009 announcing the thermostat law went into effect. The release was sent to approximately 40 media contacts in the HVAC business-to-business trade press.
- Stakeholder Outreach: TRC contacted and encouraged various stakeholder organizations representing HVAC contractors to include information on thermostat recycling in their newsletters and/or websites. Organizations include Air Conditioning Contractors of America, National Association of Oil Heat Service Managers, Plumbing Heating Cooling Contractors Association, National Demolition Association, and Institute of Heating & Air Conditioning Industries, Inc.
- National Paid Advertising: TRC placed a ½ page full-color advertisement in the August 2009 issue of *Contracting Business*, a leading business-to-business trade publication targeting HVAC contractors with a circulation of approximately 40,000 contractors. TRC also placed a 30-day advertisement on www.HVAC-Talk.com, a web-based “chat-room” for HVAC technicians.
- Engaging Members: TRC worked with member companies to promote the program through their sales channels. For instance, Honeywell posted link/advertisement to TRC on its www.contractorpro.com and www.forwardthinking.honeywell.com websites.
- Contractor/Wholesaler Collateral: TRC developed a multi-purpose “cling-sticker” that can be used by wholesale locations to promote the program. The sticker will work on a door, counter, or window. The cling is being included with return bins to California locations. TRC developed a “toolkit” for TRC collection locations, members and other interested parties. The toolkit contains “canned” articles and information on the program that others can easily use/modify to help inform customers on TRC program, a copy of the toolkit is available for download off TRC’s website. TRC also developed contractor FAQ document and templates which are available for download on TRC’s website.

Homeowner/Consumer Awareness—TRC actively marketed the program in California in 2009.

- Website: TRC created a webpage for California (www.thermostat-recycle.org/California) and posted materials on the page regarding California’s mercury thermostat disposal ban.

- **Public Service Announcement:** TRC created a 30-second radio PSA in both English and Spanish. The PSA targets consumers, encouraging them to install energy-star programmable thermostats, reminds them that many old thermostats contain mercury and require proper disposal, and directs them to the TRC website for additional information.

TRC posted the PSA on its website and provided copies to the California Integrated Waste Management Board and California Department of Toxic Substance Control. The PSA with a request to air it was sent late June, 2009 to 200 English language radio stations and 100 Spanish language stations serving the California market.

- **Earth-911:** TRC partnered with Earth-911, a nationally recognized commercial website that provides information to consumers on recycling. TRC provided them with a list of retail and HHW collection locations (including all locations as of January 1, 2010 in California). TRC also worked with Earth-911 in developing content regarding the need to recycle mercury switch thermostats which was published on the www.earth911.com website.

Program Evaluation

As California's law only went into effect July 1, 2009 it is premature to assess the effectiveness of the program. However, TRC can offer some observations/lessons from the first five months of the program.

- **Program Access:** TRC through direct and indirect communications has marketed the program to HVAC wholesalers in the state. At the end of December TRC had 263 wholesale locations listed in its database. While this is a marked increase from 2008, it is likely less than 50% of HVAC wholesale facilities in the state. TRC will continue efforts to inform wholesalers of their legal obligation and the availability of the program but decision to participate is largely outside manufacturers' control and in the absence of more direct involvement from DTSC will yield marginal increases in participation.
- **HVAC Contractor Awareness:** TRC is continuing efforts to raise awareness of the program in California and legal requirement specific to California. Initial messaging has focused on the simplicity of the program and its (no or low-cost). TRC plans on "tightening" the message in 2010 and placing more emphasis on the legal obligation.

Looking towards 2010, TRC will focus on the following channels to promote the program in California.

- **Trade shows and/or industry events:** TRC views both national and more so, regional events, as opportunities to promote the program. TRC will attend both regional and national events in 2010.
- **Paid Advertising in Trade Press:** While paid advertising forces TRC to use a more generalized message, it views traditional print and to a greater degree, web-based advertising as important components of its marketing effort.

- Stakeholder Outreach: TRC will specifically target California based organizations in 2010 and will also be looking towards engaging California utilities.

Accounting of Program Expenses

TRC is a national program and collection containers were returned from 46 states in 2009. Allocating costs to an individual state in most cases is not practicable and likely is to over/under estimate actual costs to operate the program in any given state.

Table 2: Program Expenses

TRC Staff and Administration	\$248,066
Recycling Costs	\$222,755
Insurance	\$18,706
Statutory Incentive Payments	\$27,496
New Collection Containers	\$18,130
Travel	\$16,105
Marketing & Outreach	<u>\$96,867</u>
Total	\$648,126

Staff and Administration includes all labor costs associated with TRC executive office in Virginia. Recycling costs include both staff and direct costs associated with the fulfillment of bin orders, and the transport and processing of waste thermostats.

A copy of TRC's 2008 (most recent) IRS Form 990 is included in Appendix.

Appendix A

June 24, 2009

RE: LEGAL OBLIGATION TO COLLECT MERCURY THERMOSTATS IN CALIFORNIA

Dear INTERESTED PARTY:

I am writing to inform you of a law that comes into effect in California this year that is likely to affect your business operations. The new law requires HVAC wholesalers to act as a collection point for thermostats that contain mercury. This stems from the passage of Assembly Bill No. 2347.

Fortunately, for wholesalers who are not currently collecting mercury thermostats, a convenient collection/recycling program already exists. Manufacturers of mercury-containing thermostats started the Thermostat Recycling Corporation (TRC) in 1997 to facilitate the collection of all brands of mercury-containing thermostats.

For a modest one-time fee (currently calculated at \$25 per collection container) the TRC will provide a sturdy plastic collection container that holds up to 100 waste thermostats and educational materials. TRC assumes all on-going costs for shipping and processing of the thermostats. All that TRC requires is that collection locations only ship whole mercury-containing thermostats (no other mercury-containing products) with their covers intact, return the container at least once a year and promote the availability of the program to your customers.

If you would like to participate in TRC, please call toll-free at 1-800-238-8192. Additional information on the program and participation forms are also on TRC's website at www.thermostat-recycle.org. If you have questions about the implementation of law, please contact the California Department of Toxic Substances Control.

Sincerely,

Mark Tibbetts
Executive Director

Recycle

used mercury-switch thermostats

Calling all contractors!

All HVAC contractors and wholesalers in the continental United States are encouraged to recycle used mercury-switch thermostats.

For a list of participating wholesalers, go to www.thermostat-recycle.org or call 1-800-238-8192. If your wholesaler isn't participating, ask them to start.

If you're a heating, ventilation and air-conditioning (HVAC) contractor, there's good news for you: Now you can easily recycle every mercury-switch thermostat you replace.

It's free

There's no charge to you.

It's easy

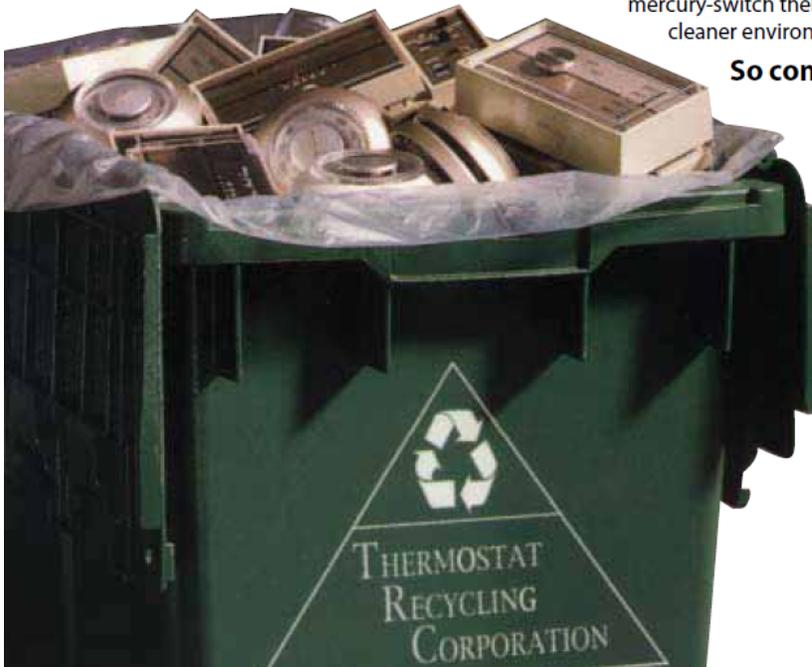

- **Store** used mercury-switch thermostats safely in your service trucks or at the shop.
- **Bring** the used thermostats—any brand—the next time you visit your participating wholesaler.
- **Put** the used thermostats in the green recycling bin or give them to your counterpart.

It's that simple! There's no paperwork or tracking.

It's good for the environment

Recycling is the right thing to do. By recycling used mercury-switch thermostats, you help ensure a cleaner environment for all of us.

So come on! Recycle!

About the Thermostat Recycling Corporation

The mercury thermostat recycling program is a service provided by the Thermostat Recycling Corporation (TRC), a non-profit corporation funded by thermostat manufacturers. The program is offered in coordination with state environmental officials.

California Mercury Thermostat Law Went Into Effect July 1

The Recycling of Mercury Thermostats is Now Mandatory in California

July 8, 2009—a new California law designed to increase the collection and recycling of waste mercury thermostats went into effect July 1, 2009. The Mercury Thermostat Collection Act of 2008 (AB 2347, Ruskin) requires a contractor who installs heating, ventilation, and air-conditioning components and who removes out-of-service mercury thermostats to take them to a collection location for recycling. The California law follows similar legislation in Iowa, Maine, New Hampshire, Pennsylvania, and Vermont.

Mercury is a toxic metal that in its various forms can accumulate in living tissue and cause adverse health effects. When a mercury thermostat is broken and disposed of in solid waste landfill or incinerator, the mercury can contaminate the air, surface water, and ground water.

Under the new law, manufacturers must collect and recycle waste mercury thermostats at no cost to contractors and homeowners. Additionally, the law requires every HVAC wholesaler with a physical location in California to act as a collection site for waste mercury thermostats.

The Thermostat Recycling Corporation (TRC) is providing collection containers to HVAC wholesalers for a nominal one-time fee. TRC absorbs all subsequent costs to ship and recycle waste mercury thermostats.

“TRC wants contractors to know that it’s easy, convenient, and most importantly free for contractors to properly dispose of mercury thermostats,” said Mark Tibbetts, TRC’s executive director. “To comply with the law, all HVAC contractors need to do is to hang onto the mercury thermostats they remove from service and drop them off for recycling at their local HVAC supplier.”

TRC is a not-for-profit corporation founded in 1997 by thermostat manufacturers to collect and properly dispose of mercury-switch thermostats removed from service. TRC provides HVAC contractors and consumers with a no-cost solution for properly disposing mercury-switch thermostats. Nationally, TRC has more than 3,000 collection containers in 48 states. TRC currently represents nearly 30 manufacturers that branded and distributed mercury-switch thermostats in the United States.

For more information about the TRC program, contact Executive Director Mark Tibbetts at (703) 841-3246 or Mark_Tibbetts@nema.org. www.thermostat-recycle.org.
