

# Alternatives Analysis Symposium II: Case Studies from the Field

July 28, 2010 • 9 a.m.-4:30 p.m.

Byron Sher Auditorium, 2<sup>nd</sup> Floor, Cal/EPA Building

**Alternatives Analysis Symposium II: Case Studies from the Field** is the second in a series of symposiums presented by the Department of Toxic Substances Control (DTSC) focusing on alternatives analysis. Please join DTSC and its presenting partners to study the experiences of those actively engaged in alternatives analysis in the marketplace.

The process of identifying and analyzing safer alternative chemicals to use in products involves a complex and science-based approach crossing multiple disciplines. Dialogue among stakeholders is critical to establishing a successful alternatives analysis process for California.

The symposium is free and open to the public. A live webcast will also be available.

## REGISTER

Registration is now open. The agenda is available on our website.

Booth space is available at the symposium for organizations interested in sharing their work in chemical alternatives analysis, green chemistry or sustainability.

For information on registration or booth space, contact [green.chemistry@dtsc.ca.gov](mailto:green.chemistry@dtsc.ca.gov).

## PRESENTERS:

**George Thompson, Ph.D.,**  
*Chemical Compliance Systems*

**Pam Palitz,** *Environment California*

**Helen Holder,** *Hewlett-Packard Co.*

**Teresa McGrath,** *NSF International*

**Dennis McGavis,** *Shaw Industries*

**Margaret Whittaker, Ph.D.,** *ToxServices*

**Michael Schmeida,** *Tremco Inc.*

**Thomas Carter,** *The Wercs*
