
SAP Questions to Consider

- Are existing and emerging data sources adequate to rely upon?
 - Specific recommendations to use Canadian model, REACH or Design for the Environment
 - If CA could take three actions what would they be that would advance GC to the greatest extent?
-

SAP Questions to Consider

- What collaborative relationship should be established between academia, government and industry?
 - Should we focus on bolstering and improving risk assessments or focus on developing a policy of requiring alternative analysis?
 - In advancing a GC curriculum should it be a distinct program or integrated into existing schools
 - What barriers exist to chemical innovation and transfer of new chemistries?
-
