

## **Sector-Based P2 Project Updates**

### **Marine Vessel Service and Repair:**

In order to assess industry needs for P2 training, staff is conducting a preliminary study of training material currently available for the industry. In addition, onsite surveys of boatyards and marinas will be conducted to assist in better understanding boatyard and marina operations.

### **Auto Body and Paint:**

- Transferring the program to regional offices and local partners
- Translating the training video into Spanish
- Outreach training and workshops are still being scheduled (on a limited basis)
- Training materials are being distributed (on a limited basis)

### **Vehicle Service and Repair:**

DTSC has partnered with the Bureau of Automotive Repair (BAR) to implement a Green Station Program. The Program is a joint voluntary recognition program based on the DTSC VSR Model Shop program where BAR acts as an outreach agent to reach all automobile repair dealers in California to present the DTSC VSR materials. DTSC will evaluate applicants and eligible participants will receive a Recognition Certificate issued jointly by DTSC and BAR.
