

Mr. Donald Owen
Chief Scientist
Cal EPA DTSC

17 January 2011

Dear Mr. Owen,

Thank you for your information request letter dated 21 December 2010. With regard to the six listed materials which the DTSC is seeking analytic information, none of the six are currently imported, produced, and/or used at NanoGram, nor were they used during 2010..

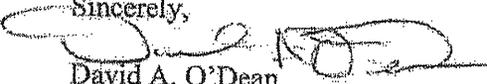

NanoGram reduced its workforce by approximately 72% in 2009, as a result of economic conditions. At the same time we shifted the direction of our research.

Our research has taken us in a direction that does not include use, production, or import of any of the listed materials, and we have no intention of using, producing, or importing them in the future.

As always, NanoGram will assist the DTSC in every way possible. Unfortunately, this does not appear to be an instance in which we can add to your data base.

Please contact me if you have further questions.

Sincerely,

David A. O'Dean
