Subject: Limiting Copper in Brake Pads: NSF Comments on Draft Regulations
Attachments: CA 2016-04-01 proposed rules (NSF changes, comments, and questions).docx

Hello Jackie Buttle,

I am Dave Schenk, an engineer at NSF International. Attached are NSF's comments to the [current draft of regulations on friction materials](#).

I explained many of the changes I made using Word's comment system. If DTSC or any other department has questions regarding my recommended changes or comments then I'd be happy to provide more details in writing or over the phone.

Please note that in some sections my comments are actually meant to express my uncertainty regarding what DTSC's intent is or if something is correct. In those cases I did not always propose any changes.

I look forward to continuing to participate in this process. Please contact me with any questions.

Thank you,

L. David Schenk III
Engineer
