

# Targeted Site Investigation Program Assessment Opportunity

*“Habitat for Humanity East Bay/Silicon Valley’s Sequoia Grove development will provide much needed affordable homeownership opportunities to hard working, lower income families in Hayward. We greatly appreciate the Department of Toxic Substances Control’s commitment of \$60,000 to this project through its Targeted Site Investigation program. Our partnership with DTSC will allow the development of this community to move forward which is a win for Hayward and for the future homeowners who will live here.”*

**Janice Jensen, President and Chief Executive Officer  
Habitat for Humanity East Bay/Silicon Valley**

The California EPA Department of Toxic Substance Control (DTSC), through their Targeted Site Investigation (TSI) Program, has \$300,000 available to perform environmental assessments for local agencies, school districts and non-profit organizations.

Under the TSI Program, brownfields sites are selected to receive environmental investigation services through a competitive application process. DTSC’s goal is to facilitate the return of brownfields to safe and productive uses.

DTSC is currently seeking properties that meet the following criteria:

- Strong redevelopment potential
- Real or perceived contamination
- Clear need and municipal/community support for the property's revitalization
- Redevelopment/reuse would benefit the community

**DTSC will be accepting TSI  
applications through  
July 11 2017!**
