The BFR 2004 Organizing Committee would like to acknowledge the following sponsors for their financial support of the Third International Workshop on Brominated Flame Retardants

- Wellington Laboratories
- Environment Canada
- University of Toronto
- University of Toronto at Scarborough
- Ontario Ministry of Environment
- Cambridge Isotope Laboratories
- Health Canada
- Thermo Electron
- Department of Fisheries and Oceans
- Chiron
- FMS
- Applied Biosystems
- Waters
- Agilent Technologies
- Canadian Environmental Modelling Centre, Trent University
WELCOME TO TORONTO
AND BFR 2004

It is a privilege to participate in BFR 2004 and, in some way, contribute to its success.

As a sponsor, we are proud to be able to support the conference, the organizing committees and you, the delegates.

Our staff are looking forward to meeting with you and discussing your current research... maybe we can help.

Please drop by our booth and...

Have a Great Time in Toronto!
Leaders in supporting Innovative Development

In 1996 Cambridge Isotope Laboratories (CIL) first introduced Brominated Diphenyl Ether standards to the analytical community. Since then, our continuing efforts to anticipate research needs have led to development of the most comprehensive group of isotopically labeled and unlabeled BFR standards.

Please visit our Booth to learn more about CIL’s extensive line of BFR analytical standards.

Finnigan™
MAT 95 XP

For a cleaner environment

Thermo Electron’s Finnigan MAT 95 XP provides unsurpassed sensitivity for polychlorinated dioxins, furans and related compounds. It is the high-end workhorse in the analysis of persistent organic pollutants, such as PCDDs, PCDFs, PBDEs, and Pesticides.
