

Terry L. Medley, J.D.
Global Director of Corporate Regulatory Affairs
DuPont Environmental and Sustainable Growth Center

Terry L. Medley is Global Director of Corporate Regulatory Affairs, DuPont Environmental and Sustainable Growth Center.

Prior to joining DuPont in May of 1998, Mr. Medley was Administrator of the Animal and Plant Health Inspection Service (APHIS) at U.S. Department of Agriculture (USDA) - a 6,000-person science and regulatory agency charged with protecting the health of the U.S. plant and animal resources. At USDA he played a central role in the development of the U.S. Federal regulatory policy for biotechnology.

He has over 30 years experience in science, environmental and regulatory matters with a particular focus in biotechnology, nanotechnology and environmental protection laws. He is recognized internationally as an expert on biotechnology, nanotechnology and environmental regulatory matters. He has served on numerous international steering committees, advisory committees and expert working groups, reviewing the biosafety of biotechnology products and the environmental, health and safety aspects of intentionally engineered nanoscale materials. He has published numerous papers and is a frequent speaker at national and international conferences. He served two three-year terms as a member of the U.S. National Academies, National Research Council's Board on Agriculture and Natural Resources. He was recently named a member of the U.S. National Academies, National Research Council's Board on Environmental Studies and Toxicology and as a member of the University of Pennsylvania's Center for Bioethics External Advisory Board.

His current responsibilities include leading the DuPont Nanotechnologies Safety Health and Environment Advisory Team. He served as the DuPont project lead for development of the Environmental Defense fund-DuPont Nano Risk Framework document for the responsible development of nanomaterials. He is the Chair of the American Chemistry Council's Nanotechnology Panel; Chair of the Business Industry Advisory Committee (BIAC) Expert Group on Nanotechnology; and the BIAC delegation lead to the Organization for Economic Cooperation and Development (OECD)'s Working Party on Manufactured Nanomaterials (WPMN). He is also a member of the International Council on Nanotechnology (ICON)'s Steering Committee.

He graduated cum laude from Amherst College and received a Doctor of Jurisprudence degree from the University of Virginia.
