

Green Chemistry THROUGH THE LENS OF Public Health A BROWN-BAG SYMPOSIUM

OCTOBER 18, 2010 • 10AM-3PM

EAST END COMPLEX, 1500 CAPITOL AVE., SACRAMENTO, CA

Green Chemistry Through the Lens of Public Health, co-sponsored by California's Department of Toxic Substances control and the Department of Public Health, expands the dialogue on the impact of current chemicals policy on public health and our children.

Dr. Margaret Kripke, award-winning professor of immunology and member of the President's Cancer Panel, will keynote this day of interactive discussion with physicians, scientists and stakeholders dedicated to improving public health.

Steve Owens, Assistant Administrator for the Office of Chemical Safety and Pollution Prevention at the U.S. EPA will present the afternoon keynote. Owens oversees regulatory and scientific and pollution prevention programs for U.S. EPA.

The symposium is free to the public. A live webcast will also be available. For details, visit www.dtsc.ca.gov.
