

9.7 PERSONNEL TRAINING

The objective of the personnel training program is to prepare site personnel to operate and maintain the facility in compliance with regulatory standards. The permit application must include a training plan which includes job descriptions and associated training to prepare facility personnel to operate or maintain the facility in a safe manner. In addition to the training requirements listed in Cal. Code of Regs., Title 22, section 66264.16, the training plan should address OSHA training requirements for personal protection, respiratory protection and confined space entry.
