REVISED SHIPMENT PLAN FOR FEED MATERIAL IN BLAST FURNACE FEED ROOM, EXIDE TECHNOLOGIES, VERNON, CALIFORNIA; EPA ID. NO. CAD097854541

Dear Mr. Strang:

The Department of Toxic Substances Control (DTSC) has reviewed the revised Shipment Plan dated July 10, 2015 (Revised Plan), regarding shipment of materials in the Blast Furnace Feed Room. The Revised Plan was prepared by Advanced Geoservices, Inc. and describes a plan by Exide Technologies (Exide) to ship feed material currently located within the Blast Furnace Feed Room. The Revised Plan was prepared in response to direction by DTSC in a letter dated July 2, 2015, to include alternate destination facilities authorized to accept the material in the Blast Furnace Feed Room. The letter states that the Plan will be implemented following approval by DTSC and the South Coast Air Quality Management District.

DTSC hereby approves Exide's Revised Plan to ship the feed material offsite with the following conditions:

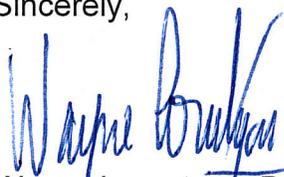

- (1) Exide shall remove all blast furnace feed material from the Containment Building and transport it offsite by August 14, 2015.
- (2) In July 2015, Exide shall pay the activity fee for land disposal for all waste remaining in the Containment Building after March 11, 2015.
- (3) Exide shall provide DTSC weekly with a daily log of shipments of blast feed material identifying the haulers used, number of trucks and total weight of material shipped for each day. The weekly submittal shall include digital copies of all hazardous waste manifests prepared during the weekly period.
- (4) Exide shall replace the Mitigation Plan for Removal & Shipment of Blast Furnace Feed [Ex-103] in the Revised Plan with the version approved by the South Coast Air Quality Management District and submit to DTSC by July 16, 2015.

Mr. Thomas Strang, V.P.

Page 2

- (5) All shipments must use registered hazardous waste transporters, hazardous waste manifests and be delivered to an authorized hazardous waste facility using the routes identified in the Revised Plan.
- (6) DTSC has verified authorization of the Doe Run facility to accept the material. Exide must submit verification to DTSC of authorization for the facility in Conesus, Texas to accept the material before shipping material to the facility.
- (7) All shipments must be transported in accordance with all federal, state and local laws and regulations.
- (8) Table 1 indicates that material from refining kettles and refining pots are included. No material from the refining kettles or refining pots shall be removed until a Closure Plan is approved by DTSC.

If you have any questions regarding this letter please call me at (916) 255-3883.

Sincerely,

Wayne Lorentzen, P.E.  
Permitting Division  
Hazardous Waste Management Program
