Project Title: Issuance of a Standardized Hazardous Waste Facility Permit, Series B, to Advanced Environmental Inc. in Fontana

State Clearinghouse Number: 2005031180

Contact Person: Alfred Wong Phone # (510) 540-3946

Project Location (Include County):

Advanced Environmental Inc. is located at 13579 Whittram Ave., Fontana (San Bernardino County)

Project Description:

DTSC approved the Standardized Hazardous Waste Facility Permit, Series B (Permit), for the Advanced Environmental, Inc. (AEI) facility to authorize continuation of the operation of a hazardous waste storage and transfer facility (Facility) to collect, bulk store, and transfer used oil, waste antifreeze, oil contaminated solid waste, and non-RCRA oily water from offsite generators. The permit would also authorize AEI to construct a new tank farm that will increase the maximum storage capacity by 12 percent. The new tank farm will replace existing tank farms and consolidate tanks into one central area. The existing tank farms will be closed as a condition of this Permit. No recycling or treatment of any waste is allowed under this Permit.

Findings of Significant Effect on Environment:
(A copy of the Initial Study which supports this finding should be attached.)

This project will not have any significant cumulative effects because (1) the Facility is in an industrial area and the activities at the site are consistent with other land uses; (2) this project will not result in air contamination because of the low volatility of used oil, oily wastewaters and waste antifreeze, (3) all storage activities will be conducted within secondary containment areas to contain any potential spillage, and (4) management practices, safe operation procedures, and inspections will help ensure there are no releases. The management of used oil and waste antifreeze by the Facility actually reduces the potential for impacts on the environment because it provides waste management capacity for generators who might otherwise improperly dispose of their used oil and antifreeze.

Mitigation Measures:

No mitigation measures are required.
