TECHNICAL COMPLETENESS DETERMINATION FOR THE PART B PERMIT APPLICATION FOR CLEAN HARBORS LOS ANGELES, LLC, LOS ANGELES, CALIFORNIA; EPA ID NUMBER CAD050806850

Dear Mr. Peterson:

The California Environmental Protection Agency, Department of Toxic Substances Control (DTSC) has completed its review of your Part B Permit Application (Operation Plan), dated April, 2010, and submitted on May 19, 2010 for the Clean Harbors Los Angeles, LLC facility located at 5756 Alba Street in Los Angeles.

DTSC made an adjustment to the closure cost estimate in the Part B Permit Application. The closure cost estimate uses 10% as a contingency cost. DTSC increased the contingency cost to 20% which will be reflected in your permit. DTSC has accepted the use of a 20% contingency cost based on CostPro, widely-accepted industry standards, and knowledge from cost estimates from previous facilities. CostPro is a computer program developed by Tetra Tech EM, Inc, for the United States Environmental Protection Agency, to assist regulatory agencies and the regulated community in preparing closure cost estimates for hazardous waste management facilities. DTSC is requiring all hazardous waste management facilities to comply with the 20% contingency cost. If you have any concerns with the contingency cost applied to your closure cost estimate, you may provide comments during the public comment period from June 8, 2010 to July 26, 2010.

Mr. Steve Peterson

June 7, 2010

DTSC hereby determines that your permit application is technically complete. Although the application is considered technically complete, DTSC may request additional information when necessary to clarify, modify, or supplement previous submitted information.

If you have any questions, please call me at (818) 717-6693.

Sincerely,

//Original signed by//

Ricardo Gonzalez
