

**Public Notice of Class 1 Permit Modification  
DeMenno-Kerdoon  
2000 North Alameda Street  
Compton, CA 90222  
CAT 080 013 352**

DeMenno-Kerdoon (D-K) owns and operates hazardous waste storage, treatment, recycling and transfer facility that recycles used oil, anti-freeze, and contaminated oil and petroleum products. D-K's activities are regulated under a Hazardous Waste Facility Part B Permit issued by the California Department of Toxic Substances Control (DTSC). D-K recently submitted a Class 1 Permit Modification notice to the DTSC's permitting team in Sacramento, CA at the address listed below.

The permit modification informs DTSC of D-K's intent to include additional test method (EPA 9075) which is an improved, newer, and more efficient test method for testing chlorine in used oil. This will not change any existing sampling method or frequency of testing

You are receiving this notification because you have expressed interest in matters concerning the D-K Facility and/or you are on the Facility mailing list. If you have any questions about the permit modification or about the D-K facility in general, you may direct them to either or both of the following persons.
