Project Description:

In accordance with the Health and Safety Code (H&SC) Section 25201.6, the Department of Toxic Substances Control (DTSC) is considering the issuance of a Series B Standardized Permit to Evergreen Environmental Services - Carson Facility (EES), EPA ID Number CAD 981 696 420, to operate a hazardous waste storage and transfer facility in Carson, Los Angeles County, California, to collect, bulk store and transfer used oil, waste antifreeze, oil contaminated solid waste, and oily water from offsite generators. No recycling or treatment of used oil is allowed under the Standardized Permit and all used oil must be shipped offsite to a permitted hazardous waste transfer, treatment, storage, or disposal facility.

Findings of Exemption:

The Department of Toxic Substances Control (DTSC) prepared an Initial Study pursuant to the California Environmental Quality Act<sup>1</sup> and implementing Guidelines<sup>2</sup> that evaluated the proposed project for the potential for adverse environmental impact. Considering the record as a whole, there is no evidence before DTSC that the proposed project will have potential for an adverse effect on wildlife resources or the habitat upon which the wildlife depend.

Findings supporting this declaration are contained in Section V. Finding of De Minimis Impact to Fish, Wildlife and Habitat of the Initial Study. This section, and any other portions of the Initial Study it references, is attached.

Certification:

DTSC certifies that the evidence contained in the record supporting the findings herein are true and accurate and declares that it has, on the basis of substantial evidence, rebutted the presumption of adverse effect contained in title 14, California Code of Regulations, section 753.5(c).
