

NOTICE OF PUBLIC COMMENT PERIOD
May 30, 2008 through July 14, 2008
THE DRAFT REVISED CORRECTIVE MEASURES
IMPLEMENTATION WORK PLAN FOR
THE GENERAL DYNAMICS ORDNANCE TEST SITE
TRACY, CALIFORNIA

The Department of Toxic Substances Control (DTSC) invites you to review and comment on the draft Revised Corrective Measures Implementation Work Plan, Solid Waste Management Unit Number 21 (draft Work Plan), Tracy Test Facility, General Dynamics Ordnance Test Site Incorporated, located at 32727 Corral Hollow Road in Tracy. This draft Work Plan proposes to add a two percent hydrogen peroxide solution to the groundwater to enhance natural degradation of mineral oil contamination. Groundwater monitoring will be conducted for a year, after which, DTSC will evaluate the treatment's effectiveness and the need for further monitoring. This site used to be known as Primex Technologies Tracy Test Facility.

As required under the California Environmental Quality Act (CEQA), DTSC must evaluate the environmental effects from any proposed cleanup actions. Based on our analysis, DTSC has decided that the proposed actions will not have significant negative impacts on the environment and are exempt from CEQA. Therefore, DTSC has proposed a Notice of Exemption under CEQA. The proposed Notice of Exemption is available for public review and comment along with the draft Work Plan.
