TECHNICAL COMPLETENESS DETERMINATION, CORRECTIVE MEASURES
STUDY REPORT, LAWRENCE BERKELEY NATIONAL LABORATORY, BERKELEY,
CALIFORNIA, EPA ID No. CA4 890 008 986

Dear Mr. Javandel:

The Department of Toxic Substances Control (DTSC), in consultation with the Regional Water Quality Control Board and City of Berkeley/Toxics Management Division, has reviewed the RCRA Corrective Measures Study (CMS) Report dated February 10, 2005. DTSC has determined that this CMS Report is technically complete.

DTSC has also reviewed the proposed soil and groundwater remediation measures in the CMS Report. DTSC has prepared a Statement of Basis for our proposed concurrence with the selected remediation measures for soil and groundwater contamination at LBNL. DTSC has also prepared a California Environmental Quality Act (CEQA) Initial Study/Negative Declaration environmental analysis of these selected remediation measures.

DTSC will solicit public input on the CMS Report, Statement of Basis, and CEQA Initial Study/Negative Declaration in a 45-day public comment period starting April 25, 2005. DTSC will hold a public hearing approximately 30 days after the start of the public comment period. DTSC will consider public input on these documents and then make a final determination on the selected soil and groundwater remedies at LBNL.
