For

Martin Metal Finishing, Inc. and Chemical Technology Labs, Inc.

AMENDED DRAFT CLOSURE PLAN

&

INITIAL STUDY/ DRAFT NEGATIVE DECLARATION

Comment Period: January 25, 2008 through March 3, 2008

WHY YOU ARE BEING NOTIFIED: The California Environmental Protection Agency, Department of Toxic Substances Control (DTSC), is obligated to inform the public that the amended draft Closure Plan for the Martin Metal Finishing, Inc. (MMF) and Chemical Technology Labs, Inc. (CTL) facilities, located at 12150 South Alameda Street, Lynwood, California, is open for public comment between January 25, 2008 and March 3, 2008. An Initial Study and draft Negative Declaration prepared pursuant to the California Environmental Quality Act is also available for review and comment during this public comment period.

The objective of the Closure Plan is to close four hazardous waste management units (HWMUs) located at the facility. Three of the HWMUs are former hazardous waste storage areas and one is a former waste water treatment system. MMF/CTL intends to close the HWMUs in a manner that minimizes or eliminates the release of hazardous materials or wastes in a way that protects human health and the environment. Recently, the property was sold and portions of the property are being leased.
