Governor

### **Safety-Kleen of California, Inc., Newark Resource Conservation and Recovery Act Permit Renewal Application**

On June 20, 2014, the Department of Toxic Substances Control (DTSC) received the permit renewal application from Safety-Kleen of California (Safety-Kleen, Inc., located at 6880 Smith Ave in Newark California 94560. The Resource Conservation and Recovery Act (RCRA) Permit renewal application has proposed no changes to the current authorized permitted storage and treatment units. However, DTSC has determined that some of the units will no longer require permit authorization. If the application is determined to be complete, DTSC will then prepare a draft permit for public review and comment.

Safety-Kleen operates 25 permitted units to store and treat hazardous waste at the Newark facility. These units store and treat used oil, oily waste waters, waste antifreeze, RCRA fuel and contaminated petroleum products.

If DTSC renews the permit, DTSC would allow Safety-Kleen to store and treat hazardous wastes during the next ten years after the Permit is approved. You may review or copy the Permit Renewal application and other supporting documents at the following location:

Newark Public Library  
6300 Civic Terrace Avenue  
Newark, California 94560  
(510) 795-2627; Call for hours

DTSC Berkeley Regional Office  
700 Heinz Avenue  
Berkeley, California 94710  
(510) 540-3799; Call for appointment

Also, documents are available for download from the DTSC web site at the following link:
