

# Public Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

## PROPOSED POST CLOSURE PERMIT RENEWAL TFX AVIATION, INC., NEWBURY PARK, CALIFORNIA

Public Comment Period: April 16 through June 3, 2016

Para información en Español por favor comuníquese con Jorge Moreno al número (916) 327-4383.

What is being proposed:

The California Department of Toxic Substances Control (DTSC) invites public comment on a proposed Hazardous Waste Facility Post Closure Permit Renewal (Permit) for a 12.85-acre project site called TFX Aviation, Inc. (Facility), also known as Telair International and the Talley facility, located at 3085 Old Conejo Road, Newbury Park, California 91320-3479.

Facility Description:

The Facility occupies approximately 12.85 acres. Currently, there are 31 office buildings, interior roads, parking spaces, a groundwater treatment system and groundwater monitoring and extraction wells. The Facility includes the following hazardous waste management units: a Closed surface impoundment; and Groundwater treatment system (Permit by Rule, permitted by Ventura County, Certified Unified Program Agency). The groundwater treatment system is operated on the portion of the Facility located at 3085 Old Conejo Road, which is the current facility address. The Facility was historically used for manufacturing civilian and military aircraft components between 1956 and 1989. During the manufacturing process hazardous wastes that included metals, cyanide, chlorinated solvents, and wastes oils were generated. Soil and groundwater at the site was impacted from the on-site waste disposal practices that included a leach field and a surface impoundment. As a result, 3,000 cubic yards of contaminated soil was removed, and groundwater and soil vapor treatment and extraction systems were installed. The groundwater remedy is ongoing and is expected to continue throughout the period of this permit.

The former surface impoundment was acknowledged certified closed by DTSC on August 26, 1987. DTSC issued an order to Teleflex in November 1990 requiring that a RCRA-equivalent post-closure permit be obtained for the facility. A final post-closure permit was issued by DTSC on November 24, 1992. The Post-Closure Permit addressed water quality monitoring of the former impoundment, closure of the solid waste management units, and post-closure care of the former impoundment. Operation of the groundwater treatment plan was subsequently taken out of the final post-closure permit and covered by DTSC's Permit by Rule process. The groundwater treatment plant was authorized by Ventura County under Permit by Rule and is not part of this permit. The Post-Closure Permit was renewed/reissued in October 7, 2005, with an expiration date of October 7, 2015.

NOTICE TO HEARING IMPAIRED: TTY users may use the California Relay Service @ 711 or 1-800-855-7100. You may also contact the Public Participation Specialist listed at the end of this update.

Cal/EPA

DTSC

State of California

Corrective action at the Facility has been conducted pursuant to the requirements of the Administrative Order on Consent issued by U.S. EPA in 1988 and the Post-Closure Permit issued by DTSC in 1992. The Permittee executed and recorded a Land Use Covenant pursuant to California Civil Code 1471, restricting use of the property. The groundwater remedy is ongoing and is expected to continue throughout the period of this permit. As of March 2016, the treated groundwater is discharged under NPDES permit CA0059609 which expires on June 30, 2020. No other industrial operations are taking place at the TFX Aviation facility.

Proposed Post Closure Permit Renewal: Issuance of the Permit would allow TFX Aviation to continue to operate its groundwater monitoring and extraction activities.

California Environmental Quality Act (CEQA): A Notice of Exemption has been prepared for this project.

How You Can Participate: Permit and CEQA documents are available for review at the following locations: Newbury Park Public Library, 2331 Borchard Road, Newbury Park, CA 91320.. Phone: (805) 498-2139; and the DTSC file room at 8800 Cal Center Drive, Sacramento, CA 95826. Contact Jan Papararo, phone: (916) 255-3705; or visit the DTSC EnviroStor website at:
