### **PUBLIC COMMENT PERIOD FOR DRAFT POSTCLOSURE PERMIT**

#### **TELAIR INTERNATIONAL NEWBURY PARK, CALIFORNIA**

The Department of Toxic Substances Control (DTSC) is submitting for public review and comment the Draft Postclosure Permit for the Telair International (Telair). Telair is located at 3303 Old Conejo Road in Newbury Park, California. Under state law Telair is required to have postclosure permit for ongoing groundwater clean up and monitoring at the site.

The public comment period begins Monday, April 18, 2005, and ends Wednesday, June 1, 2005. Written comments must be postmarked by June 1, 2005, and sent to:

Mr. Raymond Leclerc, P.E.  
Department of Toxic Substances Control  
8800 Cal Center Drive  
Sacramento, CA 95826  
rleclerc@dtsc.ca.gov

Interested parties can request a public hearing. Hearing requests must be sent to Raymond Leclerc at the address above and be received by the close of the public comment period. Hearing requests must state the reasons for a public hearing and the issues that would be aired at a public hearing.

DTSC is replacing the existing postclosure permit and issuing of a new postclosure permit at Telair. The Talley facility manufactured military and civilian aircraft components from the 1950s to 1989. The facility disposed of its wastewater by evaporation in a surface impoundment or pond that reportedly leaked wastewater to the underlying soil and groundwater. Before shutdown of the facility in 1989, Telair closed the pond by removing the pond contents, the structure, and dug out about 3,000 cubic yards of soil that contained concentrations of solvents and hexavalent chromium (Cr<sup>+</sup>) in excess of clean-up goals. Telair backfilled the pond with clean fill and covered with a clay cap and removed all remaining buildings. Installation of a groundwater extraction and treatment system was installed to contain and remediate impacted groundwater at the site.

The Post Closure Permit 10 year period ended December 24, 2002 and Telair submitted the application for renewal of the permit on December 18, 2002. On April 20, 2004, DTSC requested additional changes to several sections of the Post Closure Permit Application for renewal. Telair sent in the revised sections on June 11, 2004.

On July 23, 2004 the DTSC issued a letter stating the cap over the surface impoundment was no longer needed. However DTSC required land use restrictions that limit the site use to industrial or commercial. The application was determined to be technically complete on January 24, 2005.

DTSC has reviewed the proposed postclosure activities and determined that they will not have an adverse effect on public health and the environment. Therefore, DTSC has exempted this project from the California Environmental Quality Act and has prepared a Notice of Exemption (NOE). The NOE is part of the administrative record for this project and a copy is located in the information repositories listed in this notice.

The Draft Postclosure Permit and other site-related documents are available for public review at the information repositories listed below. Also, the entire administrative record for Telair is available for review at the DTSC office listed below.
