Ms. Margaret Rosegay  
Pillsbury Winthrop Shaw Pittman, LLP  
50 Fremont Street  
San Francisco, California 94105-2228

Dear Ms. Rosegay:

Thank you for your letter last week and your interest in opening a dialogue with the Department of Toxic Substances Control on behalf of your clients in the California automobile/metal shredder industry.

I understand you met with Peter Wood and that you will be working with him to develop a path to compliance for your industry. Many years of testing and analysis of automobile shredder waste show increasing levels of hazardous constituents contained in the waste, and thus, your industry's timely compliance is necessary.

The Department looks forward to your help in assisting your clients as we all work to keep the environment and public health protected from toxic exposure.

Sincerely,

Maureen F. Gorsen  
Director
