WORK NOTICE

SITE INVESTIGATION FIELD ACTIVITIES

Space Bank Mini Storage (Former Naval Information Research Foundation-Under Sea Center) 3202 E. Foothill Boulevard, Pasadena, California

Fieldwork activities related to ongoing environmental investigations at the former Naval Information Research Foundation are scheduled to begin in the week of October 15, 2007 and will continue through October 20, 2007 from approximately 7 a.m. until 5 p.m.

Fieldwork activities will consist of soil and vapor sampling and analysis at different areas of the site. The samples collected will be analyzed to determine if contaminants have been historically deposited in the soil that may be of concern to human health and the environment. A licensed environmental contractor, under the oversight of the Department of Toxic Substances Control (DTSC), will perform the fieldwork.

The fieldwork will include drilling to collect soil and vapor samples and the removal of excess soil derived from sampling; you may see workers and heavy equipment in your neighborhood. The soil and vapor sampling will only be conducted within the property boundaries of the Space Bank Mini Storage facility. Efforts will be taken to minimize noise and disruptions to traffic. No street closures are planned therefore traffic should not be affected.

The "Addendum to Secor Work Plan Dated March 29, 2006-Revised, Space Bank Mini Storage" is available for viewing at the following locations:
