

LIFE CYCLE ANALYSIS: 101

A DTSC BROWN-BAG SYMPOSIUM*
SEPTEMBER 23, 2010 10 A.M.-3 P.M.

PRESENTERS: JASON ORD • PETER SINSHEIMER • ANNIE WEISBROD • LIILA WOODS
ELIHU M. HARRIS BUILDING - 1515 CLAY STREET, OAKLAND, CA

Life Cycle Analysis: 101 is part of a series of symposiums presented by DTSC as an integral part of supporting California's Green Chemistry Initiative and the draft Regulation for Safer Consumer Products. This session looks at real-world examples of life cycle analysis (LCA) and how they affected product formulation, decision analysis and business practices. Presenters from industry and academia will share their front-line experiences of developing protocol and collaboration to successfully complete LCAs.

*The first in a series of brown-bag information-sharing events DTSC is sponsoring on green chemistry. Bring your own lunch and join the discussion.
