Fact Sheet, November 2008

Cleanup Plan for Proposed Valley Region Bellingham ES Addition Available for Review

A draft plan to remove contaminated soil at the **proposed Valley Region Bellingham Elementary School Addition** site is available for public review and comment. Organochlorine pesticides (OCPs) and lead were found in the soil above acceptable levels at the site which is located in North Hollywood, California. The draft plan, called a Removal Action Workplan, or RAW, was submitted by the Los Angeles Unified School District (LAUSD) for review and approval by the California Department of Toxic Substances Control (DTSC).

Why Cleanup Is Necessary

There is no immediate health risk because the public is not exposed to the contaminated soil. Long-term exposure, however, to elevated levels of OCPs and lead contamination can cause adverse health effects. In order to protect future students and staff of the new school, the DTSC recommended that the school district prepare a cleanup plan to remove and dispose of the contaminated soil. The DTSC will oversee the cleanup that will take place prior to construction of the new school and will ensure that it is performed in a manner that does not harm people or the environment.

Lead occurs naturally in Southern California soils. However, lead is also used in various manufacturing processes and was used in paint until federal laws changed to restrict its use in 1978. The elevated levels found at this site may have resulted from the use of

This Fact Sheet provides a brief summary of:

- Why Cleanup Is Necessary
- History and Operations at the Site
- Environmental Investigations
- Proposed Cleanup Options
- Safety & Dust Control During Cleanup
- Proposed Transportation Route for Trucks
- California Environmental Quality Act (CEQA)
- Next Steps
- Where to Find the Documents
- Who to Contact for Information

PUBLIC COMMENT PERIOD

November 7 – December 12, 2008

The draft RAW and other related project documents for this school site are available for review and public comment at the locations listed on page 3. The DTSC will make a final decision on the draft RAW after all public comments have been reviewed and considered. Please submit written comments in the enclosed postage paid envelope postmarked **by December 12, 2008**; or by email before the deadline date no later than 5 p.m. to:

Jeanne Matsumoto, Public Participation Specialist
5796 Corporate Avenue, Cypress, CA 90630

lead-based paint on the buildings. The sources of OCPs are believed to be from insecticides (for termite control) used historically on the site.

History and Operations at the Site

The proposed 1.8-acre site is located between Vantage Avenue to the west, Archwood Street to the south, and alleys parallel to Laurel Canyon Boulevard and Vanowen Street to the east and north, respectively (*see map on page 4*). There are nine single-family residential properties on the site. Historical use of the property includes agricultural lands dating back to 1928 and development as residential by 1956.

Environmental Investigations

Several site investigations have been conducted since 2007. The investigations found elevated levels of OCPs and lead in shallow soil that require cleanup. Elevated levels of OCPs were detected at each property at depths ranging from 0 to 2.5 feet below ground surface. The elevated levels of lead were detected at two locations on one property at depths ranging from 0 to 0.5 feet below ground surface. Based on the results of the investigations, DTSC has determined that cleanup is required at all nine properties.

Proposed Cleanup Options

The following four cleanup options were considered for this site:

Alternative 1 – No Action

Alternative 2 – Treatment

Alternative 3 – Institutional Controls and On-site Containment (Capping)

Alternative 4 – Excavation and Off-site Disposal

After careful analysis, Alternative 4, Excavation and Offsite Disposal is recommended because it is protective of human health and the environment, is permanent, and has a reasonable cost. If this alternative is approved, an estimated 879 cubic yards (1,319 tons) of soil contaminated with lead and OCPs will be removed. After the excavation is completed, clean import fill or site soils will be used to replace the contaminated soil.

Safety & Dust Control During Cleanup

The following actions will be taken during this process to ensure public safety and minimize dust:

- Installing temporary fencing with windscreens for security and dust control
- Driving all vehicles at slow speeds while on the property and streets
- Spraying of work areas with clean water to control dust
- Securing trucks with covers before they leave the site
- Brushing tires of trucks entering and exiting the site to remove soils and debris
- Monitoring the air at the site to ensure the amount of dust stays at safe levels

Proposed Transportation Route for Trucks

About 49 truckloads will be used to remove the contaminated soil from the site. Trucks will exit the site by traveling north on Vantage Avenue, turning right on Vanowen Street, turning left on Laurel Canyon Boulevard, turning left on Sherman Way, and then taking the 170-freeway North. The soil will be transported to a State-approved disposal facility.

California Environmental Quality Act (CEQA)

In compliance with California Environmental Quality Act (CEQA), DTSC has prepared a draft Notice of Exemption (NOE) for this project. The NOE states that the proposed cleanup will not have a significant negative effect on human health and the environment. This is due to the removal's short duration, its relatively small amount of contaminated soil to be removed, the controlled way in which the contaminated soils will be dug out, loaded onto trucks, and taken away to an approved/permitted facility for lawful disposal.

Next Steps

At the close of the public comment period, DTSC will review and consider all public comments and make any necessary revisions to the draft RAW prior to final approval. A Response to Comments document will be mailed to anyone who makes a comment and provides their name and address. The cleanup is expected to begin in the summer of 2009 and will take 20 days to complete. After the cleanup process is completed, LAUSD will conduct confirmation soil sampling to verify cleanup goals have been met and submit a Removal Action Completion Report (RACR) to the DTSC for review and approval.

Where to Find the Documents

The Draft RAW and other related documents for the proposed Valley Region Bellingham Elementary School Addition site are available for review at the following locations:

Bellingham Primary Center

Main Office
6728 Bellingham Avenue
North Hollywood, CA 91606
Phone: (818) 759-0119

Fair Avenue Elementary School

Main Office
6501 Fair Avenue
North Hollywood, CA 91606
Phone: (818) 761-5444

Maurice Sendak Elementary School

Main Office
11414 West Tiara Street
North Hollywood, CA 91601
Phone: (818) 509-3400

LAUSD Local District 2 Office

Main Office
5200 Lankershim Boulevard
North Hollywood, CA 91601
Phone: (818) 755-5300

Valley Plaza Branch Library

Reference Desk
12311 Vanowen Street
North Hollywood, CA 91605
Phone: (818) 765-9251
Hours: Mon. & Wed.: 10 a.m. – 8 p.m.
Tues. & Thurs.: 12 p.m. – 8 p.m.

Hours: 8 a.m. – 5 p.m. Monday – Friday

Site documents are also available online at the LAUSD web site: www.laschools.org/find-a-school

Department of Toxic Substances Control

Regional Records Office
5796 Corporate Avenue
Cypress, CA 90630
Contact: (714) 484-5337, Julie Johnson for appointment
Hours: 8 a.m. – 5 p.m. Monday – Friday

Site documents are also available at www.envirostor.dtsc.ca.gov for your review. A computer is available in the DTSC file room for your use.

Who to Contact for Information

If you have any questions about the project or cleanup activities, please contact:

Juan Osornio
DTSC Project Manager
(714) 484-5496
josornio@dtsc.ca.gov

Jeanne Matsumoto
DTSC Public Participation Specialist
(714) 484-5338 or toll free 1-866-495-5651
jmatsumo@dtsc.ca.gov

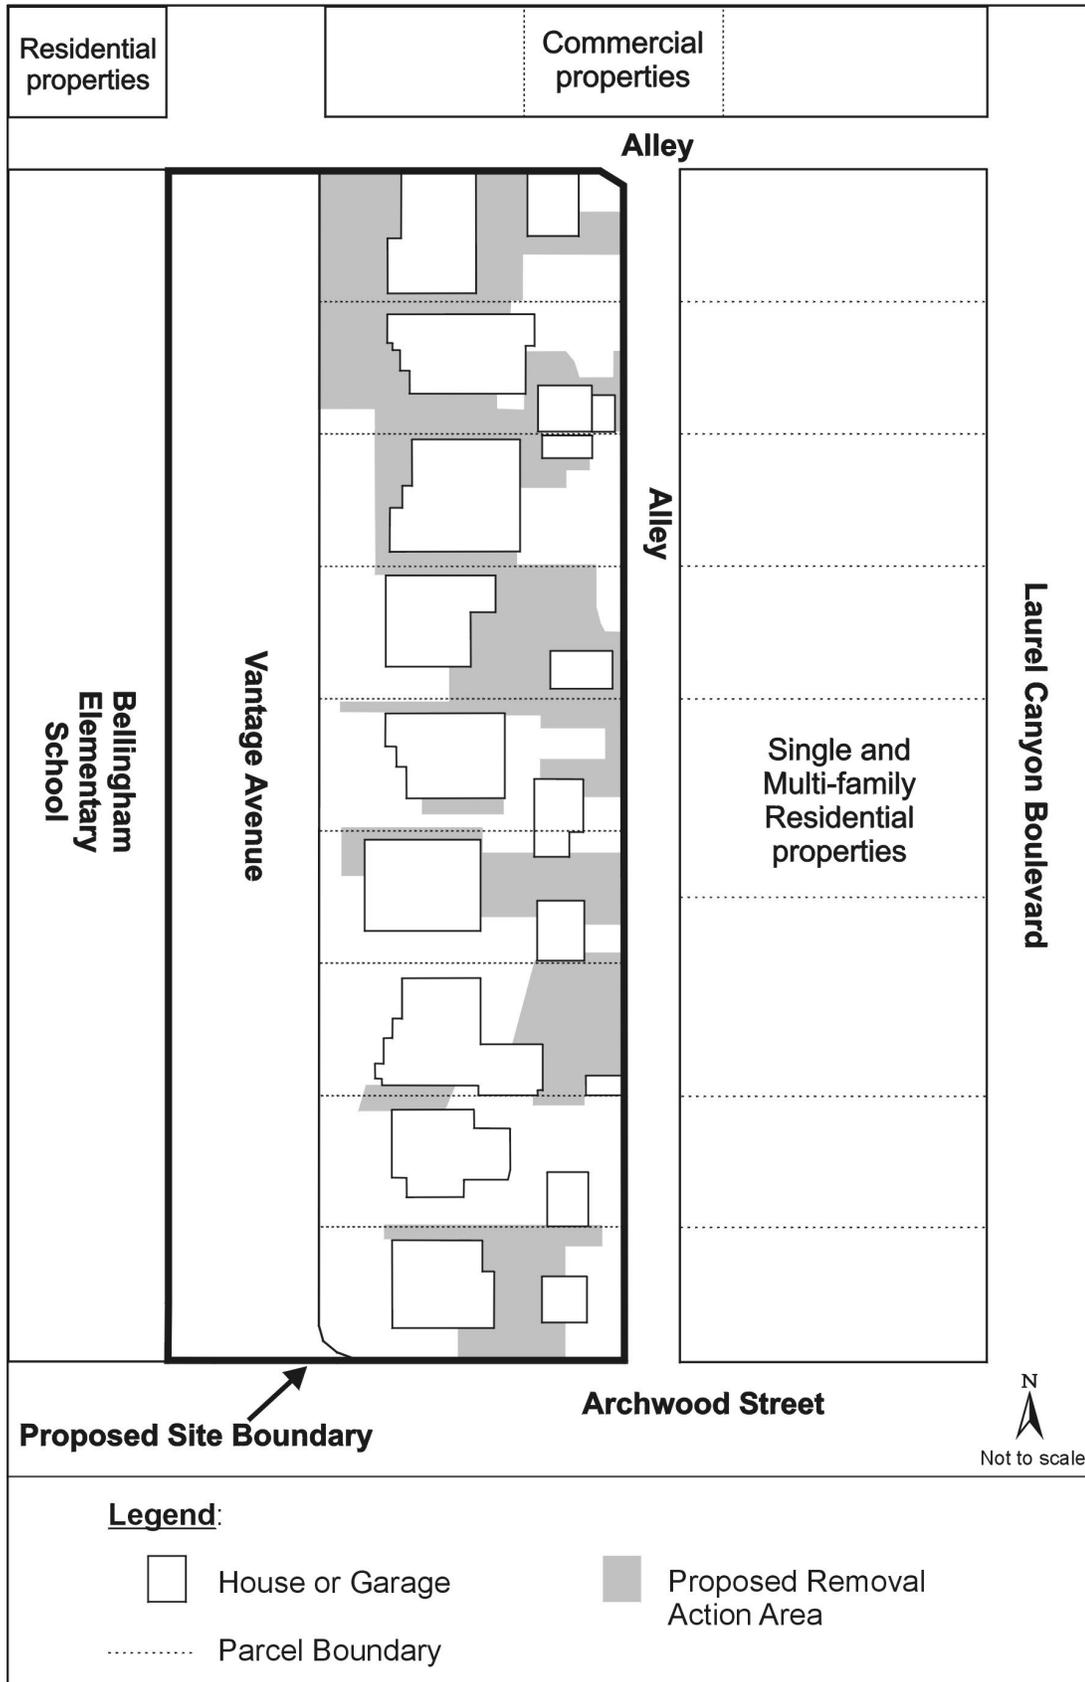

Media Inquiries:

Jeanne Garcia
DTSC Public Information Officer
(818) 717-6573
jgarcia1@dtsc.ca.gov

Notice to Hearing-Impaired Individuals

You can obtain additional information about the site by using the California State Relay Service at 1 (888) 877-5378 (TDD). Ask them to contact Jeanne Matsumoto at (714) 484-5338 regarding the project.

Valley Region Bellingham Elementary School Proposed Addition Site

DTSC is part of the California Environmental Protection Agency. DTSC oversees soil and groundwater investigations at proposed new or expanding school sites, and evaluates property for potential hazardous materials or contamination that may pose a risk to school children, the staff or faculty.
