Project Description: The California Department of Toxic Substances Control (DTSC) is proposing to enter into a Soil Management Agreement for Aerially Deposited Lead-Contaminated Soils (Agreement) with the California Department of Transportation (Caltrans) that would, under specified terms and conditions, allow Caltrans to excavate, stockpile, transport, and reuse soil contaminated with aerielly-deposited lead (ADL) that may be encountered during highway improvement projects conducted within existing state-owned highway right-of-ways (Agreement). These projects are individually subject to additional environmental impact assessments as required by the California Environmental Quality Act (CEQA) when Caltrans proposes and approves projects for detailed design and construction.

Note: The state Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
