Ladera Linda Site Notice that Late-Filed Comments Received By December 15, 2017 Will Be Considered

The Department of Toxic Substances Control (DTSC) has received requests to extend the public review and comment period for the Ladera Linda Preliminary Endangerment Assessment (PEA).

DTSC appreciates the public's interest in this site. Generally, for a PEA determination, there is no regulatorily-mandated public-review-and-comment period. Nevertheless, because of the public interest in this particular site, DTSC provided a 30-day review and comment period.

DTSC distributed a Community Update in early November, explaining that it would hold a 30-day public review and comment period for the PEA from November 9 to December 8, 2017 and hold a community meeting on November 16, 2017. The Community Update included a link to DTSC's "EnviroStor" web page for this site, where the PEA and other site-related documents were posted and available for public review.

The public review and comment period concluded on December 8, 2017. DTSC understands that there is continuing public interest in the site. DTSC will evaluate and take into consideration all comments including the late-filed comments received by Friday, December 15, 2017.

Please submit written comments to Chia Rin Yen, Project Manager, Department of Toxic Substances Control, 5796 Corporate Avenue, Cypress, California 90630 or to chiarin.yen@dtsc.ca.gov . **Comments must be received by December 15, 2017.**

After careful evaluation and consideration of all comments, DTSC will render its final determination regarding the conclusion of the PEA. If you have any questions regarding this notice, please contact Yolanda Garza at Yolanda.Garza@dtsc.ca.gov or (714) 816-1978.
