

**Santa Susana Field Laboratory
Area I Burn Pit Interim Measures
Simi Hills, California**

**REVISED AGENDA FOR
DTSC MEETING
AUGUST 31, 2006 AT 6:30 P.M.
Original Interim Measures Work Plan on Hold**

Based on new information from Boeing on the Area I Burn Pit operations, the Department of Toxic Substances Control (DTSC) has stopped review of the Draft Revised Interim Measures Work Plan for the Area I Burn Pit (and its proposed CEQA Notice of Exemption) which was to be the subject of the meeting and hearing on August 31, 2006. Instead a public meeting will be conducted consisting of:

- A presentation by DTSC of basic background information on the Area 1 Burn Pit
- An update on the new information and how it caused DTSC to revise its interim measures approach
- Discussion of DTSC's requirement for Boeing to winterize (Winterization Plan formally called the Erosion and Sediment Control Plan) the site to minimize contaminated rainwater runoff from the Area 1 Burn Pit
- Questions and comments from the public

**Public Meeting
Thursday, August 31, 2006.
6:30 PM to 9 PM.
Community Room, Simi Valley City Hall
2929 Tapo Canyon Road
Simi Valley, CA 93063**

The Winterization Plan is available on the DTSC website at www.dtsc.ca.gov. Please go to the bottom of the home page for the Santa Susana Field Lab link.

DTSC has cancelled the public hearing on the Interim Measures Work Plan scheduled for Thursday, August 31, 2006. We have also cancelled the public comment period for this proposed document. DTSC regrets any inconvenience this change may cause to the public.

If you have questions, please contact Nathan Schumacher of DTSC toll free at (866) 495-5651 or NSchumac@dtsc.ca.gov. Media inquiries should be directed to Jeanne Garcia, Public Information Officer at (818) 551-2176 or JGarcia1@dtsc.ca.gov.
