

# Work Notice

The mission of DTSC is to protect California's people and environment from harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically safer products.

## Former Teledyne MEC

3165 Porter Drive

Palo Alto, CA 94304

*Work Begins April 15, 2016*

The Department of Toxic Substances Control (DTSC) is distributing this notice to inform the community about upcoming work at the Former Teledyne MEC (Site) at 3165 Porter Drive, Palo Alto, California 94304. This investigation is part of the ongoing work associated with the 1993 Remedial Action Plan, as well as the Soil Vapor Intrusion Work Plan, approved February 10, 2016. The work will include installing five soil vapor sampling points to further investigate Volatile Organic Compound (VOC) contamination associated with historical site use. The VOCs are primarily trichloroethylene (TCE) and other solvents.

### What Work Will Happen?

Work is scheduled to occur from **April 15, 2016 through April 22, 2016, on weekdays between 7:00 A.M. and 5:00 P.M.** During this time, you may see the following activities taking place in the parking lot or areas surrounding the building:

- Workers advancing soil borings with a hand auger
- Truck mounted drill rigs advancing soil boring equipment via hydraulic force
- Workers collecting soil vapor samples for laboratory analysis
- Placement and storage of drill cuttings (displaced soil) in metal drums
