SITE INVESTIGATION/CLEANUP DOCUMENTS

- DTSC received a monthly monitoring report dated October 8, 2004, for South Coast Air Quality Management District (SCAQMD) Permit Nos. F67904 and F67906. The report describes air treatment discharge activities for the period from August 23, 2004 to September 23, 2004.

INVESTIGATION/CLEANUP FIELD WORK

- Indoor Air Quality (IAQ) sampling was conducted inside 3 residences along Golden West Lane near Wyle's northwestern boundary. This sampling was conducted pursuant to a DTSC approved sampling Work Plan. The purpose of offsite sampling is to evaluate Wyle's impact on the surrounding community.
- DTSC staff collected a groundwater sample from a private well located on 3rd and Hillside Avenue.

PUBLIC PARTICIPATION:

- DTSC staff is planning a public meeting towards the end of November to update the community on the Wyle project.
