Public Comment Period: February 1 through March 4, 2013

Para información en español por favor comuníquese con Jesus Cruz al número (916) 255-3315.

WHAT IS BEING PROPOSED? The Department of Toxic Substances Control (DTSC) invites you to comment on a proposed draft Removal Action Workplan (RAW), to mitigate soil with elevated arsenic from past nursery operations at the 95 acre Proposed City Ventures Monrovia Nursery Project (Site) located in Glendora, California.

There is no immediate health risk because the public is not exposed to the contaminated soil. However, DTSC is requiring that the Developer prepare a cleanup plan to mitigate the elevated arsenic in the soil in order to develop this site into a residential neighborhood and to protect the future occupants of the Site. DTSC will oversee the cleanup that will take place and will ensure that it is performed in a manner that protects public health and the environment.

DTSC has performed a review of the proposed corrective measure in accordance with the California Environmental Quality Act (CEQA). Based on that review, DTSC has prepared a Responsible Agency Checklist (RAC) for this project. The RAC will be attached as an Addendum to the City of Glendora's Mitigated Negative Declaration in order to provide more specific information regarding the proposed RWA remedial cleanup activities.
